QUALITY POLICY STATEMENT

It is the policy of M.J. McBride Construction Ltd. to provide services and products that fully and consistently meet the needs of our customers, and to achieve this through operations which minimise the risks to the health and safety, of the workforce and public, and any potential for damage to the environment.

The company therefore operates a Quality Management System meeting the requirements of ISO9001 in all aspects of its business. The management system is documented so that it can be interpreted consistently, readily communicated to employees and interested parties and can be continuously improved through audit and review.

The Managing Director has committed the company to providing the resources, training and conditions which will enable the workforce to operate the quality system effectively. All employees are expected to work to the Company procedures and to identify any areas where practice can be improved, thereby contributing to the continuing development and growth of the Company.

The suitability of the Quality Policy and the operation of the quality procedures will be continually monitored to ensure that customer satisfaction is being achieved efficiently and that any improvements required are identified and implemented.
